Title:
Perfect score:
Sequence: US-09-446-543A-73\_COPY\_6\_21 1 PAWYXXRGIRPVGRFX 16

Scoring table:

BLOSUM62 Gapop 10.0 , Gapext 0.5

Searched:

105224

105224 seqs, 38719550 residues

Total number of hits satisfying chosen parameters:

Minimum DB seq length: 0
Maximum DB seq length: 2000000000

Post-processing: Minimum Match 0% Maximum Match 100% Listing first 45 summaries

Database : SwissProt\_40:\*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Biol. 148:303-330(1981).

FUNCTION: ENDODEOXYRTBONUCLEASE I, WHICH IS EXPRESSED IN THE LATE STAGE, IS NECESSARY FOR TO GENETIC RECOMBINATION AND THE BREAKDOWN OF HOST DNA. IN THE EARLY STAGE OF INFECTION, TO DNA REPLICATES AS A LINEAR MONOMER. IN THE LATE STAGE, THE TO DNA REPLICATES VIA LINEAR CONCATEMERS SEVERAL GENOMES IN LENGTH. THE GENE 3 PRODUCT HAS ALSO BEEN IMPLICATED IN THE MATURATION OF THESE CONCATEMERS.

CATALYTIC, ECTIVITY: Endonucleolytic cleavage to 5'-
                                                                                                                                                                                                                                       dlphosphate + L-glutamyl-trnā(glu).
SUBURIT: MONOMER (BY SIMILARITY).
SUBCELLULAR LOCATION: CYCOplasmic.
SIMILARITY: BELONGS TO CLASS-I AMINOACYL-TRNA SYNTHETASE FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              9
